JFF **JOHN
FAWCETT
FOUNDATION**

WHO WE ARE

The John Fawcett Foundation (JFF) is a humanitarian not-for-profit organisation that assists needy people in Indonesia, with its main focus on sight restoration and blindness prevention. JFF is registered in Australia, Indonesia, the United Kingdom and the USA.

WHAT WE DO

JFF offers its assistance to people in the lower socio-economic group free of charge and without religious, political or ethnic consideration. The Foundation's headquarters are in Bali, Indonesia, and its humanitarian projects include Sight Restoration and Blindness Prevention, Children's Corrective Surgery, Prosthetic Eyes and Technology Transfer.

WHERE WE WORK

While JFF has active programs in Bali, its humanitarian projects extend to other Indonesian islands where people are impoverished and medical specialist services are scarce.

Chairmen's Reports

JOHN FAWCETT FOUNDATION (AUSTRALIA)

What a year 2017 was. Board members and supporters of our Foundation were deeply saddened by the loss of our founder, John Fawcett AM, in September whilst undergoing medical treatment in Perth. (Please see the Tribute to John Fawcett appearing in this Annual Report.)

Earlier in the year, in May, we were shocked to hear of the death of Roger Hussey, our Vice Chairman, who suffered a freak accident whilst holidaying in Thailand.

May they rest in peace, carrying with them the knowledge that their skills, humanitarian activities and great affection for the people of Bali resulted in better lives for many thousands of people.

The activities of the Foundation will carry on despite these losses.

The most important people in the Foundation are our staff. Their dedication to the tasks at hand needs to be observed to appreciate the volume of work that they carry out, almost always with a smile on their faces and never a trace of anger or disappointment. Medical personnel and their support staff of technicians and drivers, administrative staff, domestic staff and gardeners all work together as a team. They cover for each other when there are injuries or sickness, with never a complaint.

As you will read elsewhere in the Annual Report we enjoyed a most satisfactory year statistically. Donations continued to roll in (there will never be too many), and cataract operations and other eye-care requirement numbers were sustained and increased, as were prosthetic eye procedures. Children's corrective surgery operations decreased a little due to a heavy focus on sight restoration activities.

It is appropriate again to express, on behalf of our patients, sincere gratitude to all our donors, supporters, volunteers and the Indonesian Government. Our ability to continue to provide assistance, free of charge to our patients, is dependent on the strong support that we receive and we hope that we will continue

to receive. If any of you travel to Bali please feel free to contact the Bali office to arrange a visit to our headquarters. You will be warmly welcomed, and arrangements can be made for you to accompany our team on a village visit where you will see firsthand the excellent manner in which they work.

Two new Board members were provisionally appointed during the year - Gede Bingin, our Indonesian Manager, and Norbert Hoegerl OAM, a Melbourne-based microscope expert and long-standing supporter. Attendees at our AGM will be asked to confirm the appointments.

My personal thanks to my fellow Board members for their tireless efforts during the year and these thanks extend to Penny Lane, our Australian/Indonesian Coordinator. Their knowledge, experience and humanitarian qualities make them invaluable ambassadors for our Foundation.

Thanks also to our wives and partners. Their support and assistance goes a long way towards our ability as a group to provide assistance to our needy neighbours in Indonesia.

A handwritten signature in black ink that reads "Win Jones". The signature is fluid and cursive, with a long horizontal stroke at the end.

WIN JONES

JOHN FAWCETT FOUNDATION (INDONESIA)

It is again with pride and pleasure that I report to you for the second year after commencing as Chairman of the John Fawcett Foundation Indonesia. The year 2017 was another successful year that continued to focus on our core activities and achieved significant results, despite being one of the most challenging years for the Foundation. With profound sadness we lost a staff member, Sudaryono; JFF Board member and Vice-Chairman, Roger Hussey; and the great loss of our Founder, John Fawcett. Their dedication for the humanitarian cause will always remain with us.

In September 2017, our Founding Father, Pak John Fawcett departed, leaving us with his legacy. He left us with a strong and esteemed Foundation. We, the Balinese and Indonesians will greatly miss him. For the Balinese, who received the best gift that God gave us through

a giant man with a big heart, Pak John or “Dokter John”, gratitude is not enough. With his courage, passion and dedication to serve humanity, he is the role model of a true humanitarian. Therefore, everyone at JFF wants to be sure to keep John’s vision alive, and we shall be carrying the same passion and dedication for the humanitarian work. All our staff members are using their time and efforts together to make sure all committed programs and future plans are conducted successfully. Their good spirits, great enthusiasm, happy demeanour, and commitment positively infect the work, resulting in thousands of people being enabled to see colours and the world again.

Our results for 2017 reflect this enthusiastic spirit – the number of cataract operations we performed over the year compared to the previous year represented a 45% increase. This was mainly due to our successful offshore program, with a total 18 offshore programs throughout the year. This also reflects the strength of our relationships and partnerships with the government and the public. One of the real highlights of the year was the successful participation in World Sight Day held in Situbondo, East Java, in October.

There is still just so much to be done, so many underprivileged people that require our assistance,

and many areas that still eagerly await more regular servicing, by bringing the service closer to the needy. It is not only mobile eye units but also portable medical equipment that are needed for reaching the distant isolated islands of Indonesia. The ability to provide increased access to high-quality eye care and sight restoration to these isolated people will always be critically dependent and reliant upon you, our benefactors, and our ability to raise sufficient funding to support existing efforts that, hopefully, allow us to further expand our work.

The Prosthetic Eye Program lifted its capacity with many children and young people receiving prosthetic eyes. This program not only gives the confidence to the patients; it also gives them dignity. The numbers operated in our Children’s Corrective Surgery decreased in 2017, mainly due to our greater focus on the Sight Restoration Program.

We thank all our supporters, donors and partners for your kind and valuable contributions; your generosity and support enable us to continue our work. Thanks also to the Board members of the John Fawcett Foundation Australia, UK and Indonesia and special thanks to all the staff.

A handwritten signature in black ink, appearing to read 'Geede Bingin'. The signature is fluid and cursive, written over a white background.

GEDE BINGIN

**“They are blind
because they are poor
and they are poor
because they are blind”**

“Help us to break this cycle of poverty and blindness”

John Fawcett

Tribute to Our Founder, John Fawcett

In the words of Scott Bevan, Australian Journalist who wrote John's biography *Water From the Moon*, on hearing of John Fawcett's death ...

"Who and what did the world lose when John died in September 2017 at the age of 85?"

The Balinese lost their beloved 'Mr John'. Australians lost a gentle unofficial diplomat, who brought our neighbour closer in profound ways. Many of those close to him lost a mentor.

Now John's eyes are closed, but about 50,000 windows to his soul remain open. For his vision lives on, through the lives of all those former patients."

John Fawcett, founder of The John Fawcett Foundation, established an organisation that has directly and positively affected the lives

of well over a million people. Widely known in Bali as 'Dr John', his assistance to those in less fortunate circumstances earned him the love of the Balinese people and the respect of those in government circles. With the Foundation's programs moving offshore from Bali to other islands, the respect for John's name and that of his Foundation have expanded throughout the Indonesian archipelago.

John Fawcett was a unique individual, totally dedicated to his humanitarian work, and an inspiration to all who met him.

He had the ability to gather about him a team who took on the spirit that he imparted, and this has built the Foundation into the strong organisation it is today. The team in Bali, the Board in Australia and the Trustees in the

United Kingdom, are committed to continue with John's work and will carry with them the strong memory of his inspiration and dedication.

As Scott Bevan reminded us, John espoused the philosophy: *"Things happen in life that make you feel 'that's got to be the end'. But it's not. No one can take away the happy memories of what has been, but it doesn't mean you don't open the door and step through to what is next."*

What is next for the Foundation will happen without its founder, its mentor, but the inspiration that John gave will carry the team forward to achieve even greater things in his name.

PENNY LANE
International Coordinator

Sight Restoration and Blindness Prevention

Blindness prevention and cataract surgery is an ongoing challenge in countries like Indonesia, a challenge our Foundation has taken on and will continue into the future. With over four million needlessly blind in this country

and over eight million visually impaired, the challenge is a big one. The social and economic costs of these large numbers are enormous, not to mention the personal difficulties of the blind individuals and those who care for them.

JFF'S SIGHT RESTORATION AND BLINDNESS PREVENTION PROJECT

JFF's signature mobile eye clinics take the surgery and service to the people, offering free eye screening, glasses, eye drops and cataract

surgery to the blind in villages across Bali and other islands of Indonesia.

KESETIAAN

FIELD EYE SCREENING – 47,027 ADULTS IN 2017

The Foundation's teams conduct mass village eye screenings in Bali and other provinces. At these sessions, 500-700 people are

screened for eye problems in a single day. Glasses and eye drops are distributed to those who need them, and people who are cataract

blind are identified and operated on the same day in the mobile eye clinic.

SCREENING SCHOOL CHILDREN FOR EYE PROBLEMS – 8,583 IN 2017

JFF's team goes into village primary schools to check the eyesight of the students. The purpose is to detect eye problems early, treat them if possible and prevent them worsening.

Glasses are issued to those who need them, and eye drops provided for those with infections.

children and teachers about caring for the health of their eyes and avoiding accidents.

The team leader also takes the opportunity to educate the

3,309 SIGHT RESTORATIONS IN 2017

JFF's sophisticated mobile units take the cataract surgery to the people in their villages so that the

cataract blind can be operated in a sterile environment by JFF's experienced ophthalmic surgeons

and nurses. Patients are identified at a village eye screening and operated the same day.

ADOPT A VILLAGE MOBILE EYE CLINIC – BALI

JFF's team ran 72 separate village programs in Bali, screening 26,883 village people and operating 602 cataract blind. Cost is A\$2,500 for

a two-day program during which around 500 village people are checked for eye problems, glasses and eye drops are distributed to

around 60% and up to 10 cataract-blind people are operated in the mobile clinic.

Many donors take the opportunity to visit and take part in the village eye screening and operating activities to see firsthand how their funds are spent.

REACHING REMOTE COMMUNITIES

An ever-increasing amount of JFF's work is now happening outside Bali. The need in other islands is acute, with high incidences of poverty, lack of access to specialist medical facilities and high levels

of population. We find greater numbers of people blind with cataracts in these areas than in Bali where JFF's Sight Restoration and Blindness Prevention Project has been active for 26 years.

JFF is fortunate to have a unique partnership with the Indonesian AirForce which transports our team, equipment and mobile clinic to remote parts of Indonesia to reach even more people in need.

The JFF team visit one of the remote villages in Papua, accessible only by boat.

Air Chief Marshal Hadi Tjahjanto, 2017 Chief of Staff, Indonesian Air Force (now Commander of the Indonesian Armed Forces) visiting the JFF eye program in Banyumas, Central Java run in partnership with the Indonesian Air Force.

In 2017 15 separate offshore programs were run in Flores, East Java, Central Java, Dompu (Sumbawa), West Papua, Aceh,

Sumatera and Maluku. On these islands the JFF team screened a total of 16,210 village people with eye problems and 1,636

people who were blind with cataracts received sight-restoring operations.

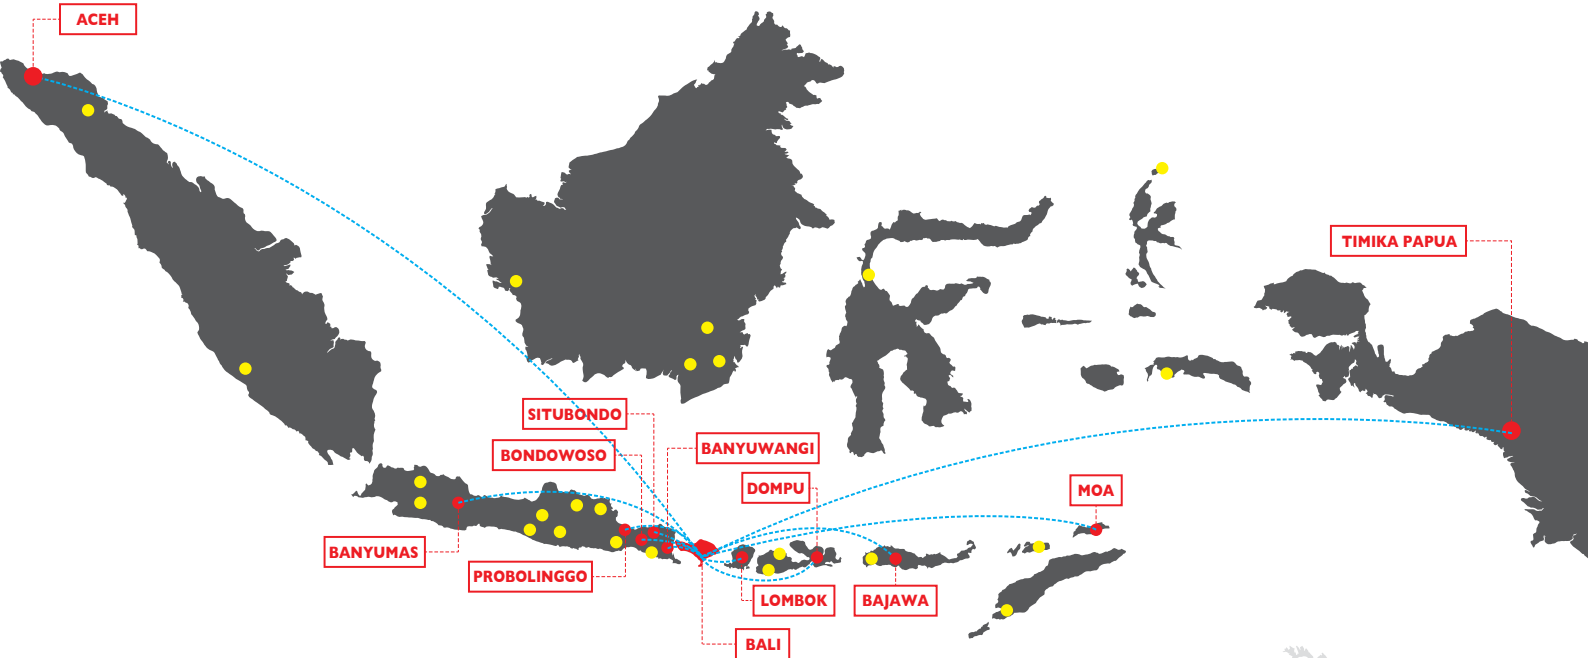

Program locations 1991 -2016

Program locations 2017

INDONESIA

WORLD SIGHT DAY 2017 – ‘MAKE VISION COUNT’

World Sight Day is an annual day of awareness, coordinated by the International Agency for the Prevention of Blindness under the VISION 2020 Global Initiative, held on the second Thursday of October, to focus

global attention on blindness and vision impairment.

JFF celebrated World Sight Day 2017 by conducting a mass screening and operating program in Situbondo, East Java. JFF's entire fleet of four

mobile eye clinics and an extended team spent six days on location, screening 2,879 adults and children with eye problems and operating to restore the sight of 357 cataract blind people.

CHILDREN'S CATARACT SURGERY

Children with cataracts undergo a general anaesthetic and are operated using Phaco-emulsification, a different technique than that used for adults in our program.

Nine cataract-blind children were operated by Dr Wayan Gde Dharyata in the Puri Raharja Hospital, Denpasar in 2017. Two of the children were identified during one of the Sumbawa

programs and funds were provided by PT Sumbawa Timur Mining for the operations and transport of the children and their families.

Children's Corrective Surgery

JFF provides free operations to children from poor families who suffer from congenital deformities such as cleft lip and palate.

Our Bali program is supported with discounted rates by the Puri Raharja Hospital in Denpasar and surgeon, Dr Ketut Anom

Ratmaya, and is also assisted by anaesthetists from the Bali Anaesthetists' Association who provide their services free of charge.

A total of 18 children and young people were operated in this program in 2017.

Prosthetic Eyes

The provision of a natural-looking artificial eye restores the confidence and dignity of the patient so that he or she can have a normal life, free from disfigurement and social stigma.

In 2017 JFF's prosthetic eye technician, Wayan Wijaya, made artificial eyes for 91 patients.

Each prosthetic eye is custom-made by hand for the patients

so that they look as natural as possible and move with the other eye, so much so that it is difficult to detect which is the artificial eye and which is the real eye.

Helena College Program

This Program was initiated in 1996 by John Fawcett and Mr Chris Brown who was a teacher of Indonesian at Helena College, Perth, at that time. The plan was to select two Balinese students who had just completed their secondary schooling in Bali and send them to Helena College for one term to experience life in Australia and to learn English and Computing, as well assisting in the

Indonesian language and culture classes.

Since 1996, 35 students have participated in this Program, returning to their island community enriched by the experience. In 2017 19-year-old Ni Nengah Meryandiani and 18-year-old I Nyoman Tatwa Surya Dewata were given the opportunity to go to Helena College.

MAINTAINING QUALITY OF SURGERY AND SERVICE

JFF's priority is to maintain the highest possible quality of treatment to all recipients of its assistance. Surgeons and other medical personnel working in our programs are assessed and if necessary given training in the special surgical techniques we use.

This is possible through the invaluable contributions to JFF's humanitarian work that are

made by the many volunteer medical specialists from Australia who travel to Bali at their own expense to pass on their skills and knowledge to the Indonesian medical personnel who work in our projects.

JFF is very pleased to welcome Dr Anthony Moriarty, MA FRCS FRCOphth, as a consulting ophthalmologist to the

Foundation. Tony made three extended visits to Bali in 2017, joining the team on field trips, including the World Sight Day program in Situbondo in October, and participating in the International Ophthalmology Symposium held in Bali in early December.

Special thanks also to Professor John Crompton, a member of the JFF Board, who spent a week in Bali in July working with the young ophthalmologists at the University of Udayana, Denpasar.

Congratulations to Professor Crompton, who was inaugurated as an Honorary Professor at the University of Udayana in July 2017.

This is a great honour for Professor Compton and JFF, and reflects very positive relationships with the Ophthalmologists' Association, PERDAMI Bali, and the Udayana University, Bali.

MOU WITH PERDAMI BALI

JFF's Agreement with the Bali Ophthalmologists' Association (PERDAMI Bali) was renewed for a further three years in April. This is

a vital Agreement for JFF, enabling us to work in the villages of Bali offering cataract surgery to the poor.

Members of PERDAMI operate in the mobile clinic in a partnership arrangement with JFF.

INTERNATIONAL OPHTHALMOLOGY SYMPOSIUM - IOS

In collaboration with The John Fawcett Foundation, Sanglah Hospital and Udayana University Medical Faculty, the Bali branch of the Indonesian Ophthalmologists' Association (PERDAMI Bali) held its second International Symposium to increase knowledge and improve the skills of ophthalmologists in Indonesia. The focus topic was 'Updates in Ocular Manifestation of

Malignancy, Infection-Immunology and Metabolic Diseases'.

The threatened imminent eruption of Gunung Agung prevented many participants attending the Symposium in person, but national and international links were set up to enable it to proceed so that more than 100 ophthalmologists and registrars participated in the two-day symposium and workshops.

Volunteer ophthalmologists of the Foundation who participated in this symposium were Dr Anthony Moriarty (UK), Professor David Mackey (Australia) and Professor Stephanie Watson (Australia), while JFF's staff, Gede Bingin, Wayan Helmy, Nyoman Wardana and Susi provided essential support services.

Fundraising and Promotion

JFF's humanitarian work is dependent on donations and grants. Twenty-six percent of our funding comes as the result of funding submissions to

foundations, organisations and governments, while individual and corporate donors contribute 73% and miscellaneous income represents one percent.

Many of our supporters hold their own fundraising activities for JFF, and we are very appreciative and grateful for this enthusiastic support.

JUNE & DECEMBER APPEALS

Our Australian appeals in 2017 were sent out by post and by email, and we sincerely thank all those who responded to these.

CATARART CAMPAIGN

TBWA, a large and very successful advertising company based in Singapore, offered its skills and services to JFF pro bono to develop an online, live promotional campaign via Facebook, where well-known artists create artworks using

goggles designed to simulate a degree of cataract blindness.

In January six members of the TBWA Team attended a village screening and cataract surgical program and met with four leading Balinese artists who agreed to

participate in the campaign. The team worked through the year to develop the CATARART campaign that was launched in December, the proceeds of which were donated to JFF.

Financial Summary

The Financial Report represents the consolidated summary financial statements

for the John Fawcett Foundation (Australia) and the John Fawcett Foundation (Indonesia).

Donations and expenditure have been converted to Australian dollars.

PRO-BONO AUDITS

We would like to express our sincere appreciation to Mark Thornton (Western Australia) and Roger Shaw (Independent

Examiner, UK) who undertake the audits for the Australian and UK foundations respectively on a pro-bono basis.

This is of enormous value in both monetary terms and in terms of establishing our Foundation's financial credibility.

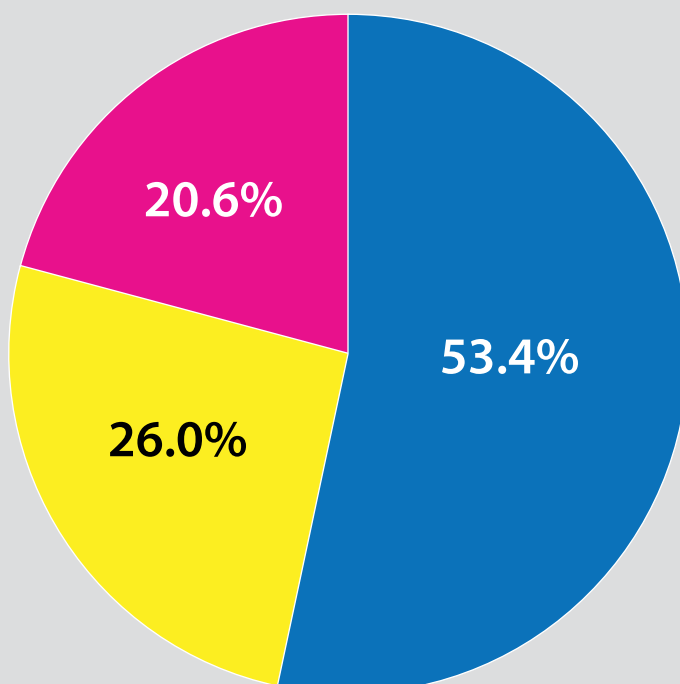

OPTIMISING YOUR DONATIONS

Donations of equipment and medical supplies, as well as the contribution of medical specialists

who volunteer their time and skills at their own expense, mean that donated funds can be more

effectively directed towards our projects – providing free surgeries, glasses and eye drops for the poor.
