JOHN FAWCETT FOUNDATION

GIVING GIFT OF SIGHT

DONOR REPORT – JANUARY - FEBRUARY - MARCH 2026

QUARTERLY REPORT

On behalf of the entire team at the John Fawcett Foundation and those who have benefited from our eye health and sight recovery services, made possible only by your kindness, generosity, and support – **THANK YOU!**

Please find below our 2026 First Quarter Donor Report. The funds you have contributed have made an enormous difference to so many lives and enabled the Bali JFF Team to achieve the following.

JFF OUTCOMES FOR 2026 (3 months)

ACTIVITY	TOTAL
Screening adults – checking eyesight and refraction	**7,913**
Screening school children – checking eyesight and refraction	**109**
Glasses distributed	**5,753**
Eye medicines distributed	**4,102**
Cataract surgeries (adults)	**570**
Cataract surgeries (children)	**0**
Other Eye surgeries (adults)	**0**
Prosthetic eyes	**15**

PROJECT ACHIEVEMENTS 1991-2025

ACTIVITY	TOTAL
Screening adults – checking eyesight and refraction	**1,300,060**
Screening school children – checking eyesight and refraction	**98,612**
Glasses distributed	**661,612**
Eye medicines distributed	**669,654**
Cataract surgeries (adults)	**75,899**
Cataract surgeries (children)	**505**
Other Eye surgeries (adults)	**2,143**
Prosthetic eyes	**1,417**

Summary of services provided in 2026

The JFF Programs are provided free of charge at the headquarters (HQ) in Sanur, throughout Bali, in both local and remote villages, offshore on many Indonesian islands, and in conjunction with external clinics to support outsourced services.

As a result of the funding you have generously provided, the JFF team travel to provide the services where they are most needed to those who would not otherwise have access to eye health care and surgical services. When they are not travelling, they also provide services from the JFF Headquarters to ensure the program is available to all in need.

So far this year, the JFF Team delivered the following programs:

1	**Offshore Program –** multi-day program. Provided in Lumajang, East Java, in February
27	**Bali Village Programs** – local and remote locations.
20	**Headquarters Community Program days** – based in Sanur for all services from screening to cataract surgeries and post-op support.
2	**Outsourced Clinic Programs** – 218 cataract surgeries at two locations - Lombok and East Java.

Even with all these programs in place, millions throughout Indonesia still need eye care services.

2026 OFFSHORE PROGRAM

So far this year, the JFF team has travelled with the mobile eye clinics to one offshore location.

Please note that only one offshore program took place in the first few months of this calendar year due to numerous cultural and religious events throughout this period.

Offshore Location	Total Patients Screened	Glasses Distributed	Medications Provided	Cataract Surgeries	Prosthetic Eyes
JANUARY - *no offshore program this month*					
FEBRUARY - LUMAJANG - East Java	**2,222**	**1,567**	**900**	**200**	**7**
MARCH - *no offshore program this month*					

THANK YOU

Your support is incredibly valuable in helping our Foundation work towards its long-term goal of providing sight-restoration and blindness-prevention services to people from lower socio-economic groups in Indonesia.

We also thank PERDAMI Indonesia for providing ophthalmologists to work with our team and perform surgeries, and the ONE SIGHT EssilorLuxottica Foundation for donating glasses.

Access to eye health services, blindness prevention, and cataract surgery remain ongoing issues in Indonesia. To deliver these services is a challenge our Foundation has taken on and will continue to address. JFF's unique program, which takes services to people in their villages via the mobile eye clinics, enables us to reach and assist more people in need in remote and impoverished communities.

Thank you again for your support.
